

About The RenovoData Backup Solution

We give PEACE OF MIND to our trucking and transportation customers. Allowing them to focus on their daily operations.

Our DEDICATION to Customer Service sets us apart from simple cloud-based online computer and server backup companies.

One time, Bob actually informed us that McLeod had performed an update on their software, and he implemented everything we needed, without us ever having to think about it.

All the worry has gone. We have **100% SATISFACTION** with RenovoData.

I would recommend RenovoData 100% to a potential customer needing to safeguard their information.

**- Patrick Kasarda,
Anchor Freight, OK**

Anchor Freight - The Back Story.

Before RenovoData, Anchor Freight used tape backups on three machines. They also had an older less reliable server that was prone to failure and became a constant worry.

The tape backups were a huge burden on the employee running the program, expending many hours working with them and making it difficult for them to be absent.

“Hiring RenovoData relieved us of all that stress and worry. After speaking with Chuck, VP of sales, a very knowledgeable guy, we set up the system with Bob. Bob is basically the guy who makes it all work.

Bob remotely accessed our system and set everything up, he showed us how to use it, and performed some tests where files were removed and restored.

”

The Solution

RenovoData was able to free Anchor Freight's operations staff of the mundane but important task of taking backups offsite each night. With RenovoData's automatic, secure backup solution, the Operations Manager, Patrick Kasarda and his staff can focus on revenue generating tasks. Since RenovoData understands many aspects of McLeod Software, RenovoData's support staff was also able to identify potential hazards before a problem or issue occurred.
