How has having RenovoData as a data protection partner influenced JGR's working environment?

Now that we have RenovoData in place, I feel confident that if in an event a disaster occurred that we could now get back up and running quickly. I would recommend RenovoData to anyone who is looking for a leader in Data Backup and Disaster Recovery solutions

**- Ryan Mostoller,
J. Grady Randolph**

Customer Overview

J. Grady Randolph, Inc. is a family owned and operated company that specializes in the heavy haul sector of the trucking industry. Founded over 75 years ago, with a single truck, JGR has grown to operate in 48 states and Canada. Based out of Gaffney, SC, JGR has a fleet of more than 135 company-owned units, along with over 20 owner-operators. Many of the 140 people employed at JGR have been with the Randolph family for decades.

Problem

Ryan Mostoller was new in his position as IT Director of JGR and determined that the company needed to source a reliable Data-Backup solution. Ryan researched, and then educated management on the importance of offsite backups, in addition to their local tape backup. Ryan felt strongly that protecting digital assets and information was the most important factor to the continued success of JGR, after their human capital.

The Solution

Ryan turned to RenovoData for help. RenovoData's position as a **McLeod business partner** was a key selling point. Ryan felt that RenovoData's relationship with McLeod gave them instant credibility, especially as his TMS software provider also used RenovoData for backup services. In addition, RenovoData's high level of service and support was a key selling point for JGR. Finally, the ability to have the backup solution running in the background without straining system resources, combined with excellent automation and little maintenance, allowed Ryan Mostoller to focus on getting more work done.
